ON ENERGY AND VIBRATION (continued)

Beloved Children of My Heart:

If man could even partially comprehend the law governing energy and vibration, he would be in a fair way toward self-mastery. As We have said before, there is no such thing as a being without vibration and radiation. Man is in training, and he will come, one day, to a realization that the power to create vibration is not only a responsibility, but an opportunity by which mastery and divinity can be experienced through the individualized ego.

For millions of centuries, man, by accepting individuality, has created vibration which moved from the center of his being to the periphery of the cosmos, and is constantly, throughout the entire course of his individualization, affected by every electron within that cosmic orbit, to some degree - just as when you drop a pebble into the center of a pool you see the eddies go out in ever-widening circles until they reach the periphery, returning again to the center, so everything within that pool is affected by the vibrations caused by the activity at the center. From the very moment man took being, the electronic light, in obedience to the decree of the Father, became his servant. When the vibratory action that he set into motion reached the periphery of its circle, it began its return journey back into his own experience and the bombardment of the returning light sent back from the sounding board of the universe became that which is known as karma - the more positive and intense the individual - the more powerful the vibration and its amplification back into the lifestream, whether the outgoing quality be good or evil.

As the vibratory action around him became more and more chaotic, desire for knowledge and a way and means of finding peace arose within his heart. Then the man became an applicant for Godhood, and it is at this point that the training of the lifestream began. The intricacies of vibration are such that I could spend a full week in illustrating the tremendous impact of one individual on the universe - each organism within the body vibrating and emitting certain energy waves that contribute to the light or shadow of the planet. Thus, the body elemental alone affects the passion or the aspiration of every incarnate soul. Then the soul has a vibration which, when awakened, is a power-force for good, for every seeker, no matter how confused the search, affects the mass consciousness of all souls toward aspiration.

Then the mind tunes in and vibrates, according to its choice of material, affecting in turn all the mind stuff in the universe; and so we could go on and on in amplification of the powers of vibration - unconscious vibration this is. Now we come to the opportunity of consciously directing into the universal light a vibration that would be of beneficent interest to the universe. The mind, the heart, the intelligence can be incorporated into this experiment. Visualize the electronic light - unformed - with every electron intelligent, receptive, obedient, alert - waiting for your message - then set up a vibration consciously in your feel-

ings; see the energy waves pass out from you in ever-widening circles and the obedient electrons start into motion. Choose, if you will, a particular quality or a blessing that would benefit the race. It is a beautiful pastime for spending an hour of relaxation, and is a wonderful treatment for the body, the nervous system, and the soul. First, one must experiment with the mind, the heart, the feelings, and later the ganglionic centers can be trained to send forth these vibrations even when the conscious mind is busy with other matters. The untrained people of the world do this unconsciously in the sending forth of Christmas and Easter blessings. Let me see now what My chelas will do consciously.

Blessings and Love,

MAHA CHOHAN

Beloved Children:

The Great Universal Intelligence becomes the Father of the Universe long before a planet and its people come into manifest expression and this Great Intelligence works out in detail every department which will form a necessary faucet through which the lifestreams who will incarnate upon it must flow to keep balance and progress. Through this 'Father Presence' there are directed out into universal space, with geometrical accuracy, certain foci which will be radiating centers through which the life force of the incoming planet shall pass, qualified according to their service for the good of the race which will evolve upon it. The Intelligences who enter into these foci are, for the most part, voluntary beings from other spheres who, by their own self-conscious effort, draw the life force from the universal and radiate the required substance such as the sun rays and the air, as well as the qualities and virtues that make up the individuality.

At a later date, from among the mankind of the planet, individual intelligences will be evolved and the volunteer occupant of that cosmic center will relinquish his position in favor of the being whose evolution has prepared him to hold such an office. It is thus that I achieved and entered into the Office of the Maha Chohan, which I presently hold, having succeeded many previous exalted Beings whose wisdom, effort, radiation and power have made possible My present position, and
